The tools in AutoCAD are grouped into various toolbars, which can be dragged and dropped into any area of the drawing. Design and Drafting In the Design and Drafting tab, you can open and create DWG or DWF files, edit an existing file or layer, add annotation and/or dimension marks, layout, plan and analyze, trace, print, export to other formats, and convert to a PDF file. In this tab, you can also create cross-references, set linear and angular snap, move and rotate objects, add axis objects, snap to a grid, and define guides and visual styles. Most of the Design and Drafting tools are located in the ribbon at the top of the screen. There is a button on the ribbon that, when clicked, moves all of the tools to the Design tool bar. The following images show the Design and Drafting ribbon and tool bar: Open File This tool opens a specific file by default. You can click on a folder to open that folder. You can also drag and drop a file from the Windows desktop to the drawing. Save Click on this tool to automatically save the current drawing to

The AutoCAD raster (GIS) tools included with AutoCAD are Viewer, Model, Feature, 3D, Map and Feat. In addition to the common CAD platform interfaces, there are also tools designed for specific user tasks. There is a set of UNIX shells, like AutoCADmploy, available, which provides remote computer access and allows interaction with AutoCAD. There are some more modern development interfaces, such as the Web interface and the new API and the proprietary Web browser "AutoWeb", which are available in 2019. AutoCAD is available in different editions: AutoCAD Basic, AutoCAD LT and AutoCAD LT/Map. AutoCAD Basic is designed for the most common user tasks, including the ability to use AutoCAD without an AutoCAD license. However, users are not able to import or export data, for example. The software is, therefore, considered more of a toolbox than a drafting package. AutoCAD LT is more of a drafting package, and it is intended for single- and multi-user drafting and analysis, and can be used to generate parts in the product "AutoCAD LT Enterprise". It is based on the old AutoCAD 9.0. While the price for AutoCAD LT in 2010 was for AutoCAD LT/Map, the current version of AutoCAD LT/Map costs approximately while the remaining AutoCAD LT costs approximately. AutoCAD LT Enterprise is only available in the UK, can be used by multiple users and supports several simultaneous users.
