Enter your email address to subscribe to this blog and receive notifications of new posts by email. Jeff, Attached for your review is a proposed version of the CA for the Turbine Components Agreement. Sorry for the delay in getting this to you but I was waiting for a change to the Mexican law which is necessary to permit the transfer of these assets from Mexico into the United States. Please call either Carlos Torres at (214) 665-8548 or myself at (214) 665- 8422 if you have any questions or need to discuss any part of the CA.

Ruy M. (See attached file: Enron-Turbine-Components-Agreement-revised.doc) Q: How to create custom navigation point in site map XML I have created a custom navigation point in a site map. The problem is that I need to display this point as a sub-menu item. So that when a user clicks on that point, the selected site is go to

invoice.aspx. Is it possible to do it? A:
Unfortunately there is no out of the box way to achieve it... but custom navigation points allow to do exactly what you want to do! You create a navigation point and then a custom user control that will act as your submenu. Let's call it: SubNavigation.ascx and have an instance of it on your project... let's say in your subnavigation control (/subnavigation.ascx): Now, in your main menu (/menu.ascx), if you have a property named NavigateUrl, assign this custom navigation point to it:
