The Elden Ring is a fantasy action RPG. It is a game full of combat, character growth, and excitement, is not just a simple quest for treasure but also a journey of the heart. In the game, you will rise to Tarnished and become a Lords of the Elden Ring. As you advance, you will learn and experience the strengths and weakness of your character, and, in the game, you will form relationships with other Lords and enjoy their company. You will take on the swords, shields, and magic of your Elden Ring and battle against Elden Lords in various ways. You will fight monsters by yourself or in groups, and via dungeons and the overland. 1. Visual • MapleStory Name Panel • El Dorado-esque Tavern • El Dorado-esque Tavern • Be Scaled to the Screen Size • Unity3d Hinterlands is still a WIP • Icons and Backgrounds are all in Unity3d. _____ ART / GRAPHICS • World Background In order to achieve a realistic atmosphere, a real world texture was used as a base as a basis for the topographical details of the overworld map. It is entirely hand-drawn by myself. Of course, my drawing is not perfect, but I believe that the combination of hand-drawn art and detailed drawing can create more character than if I only used a flat texture. • Overworld Map Additionally, in order to bring out the gorgeous look of the overworld map, graphics from the MapleWorld MAP were used as a basis, with hand-drawn graphics added. _____ MUSIC All songs in the game are produced by myself. I was struggling for many days in order to try to create the melody of this game, and after much trial and error, the unique style of the game was born. I think the challenge lies in the fact that I had to combine the background music with the overworld map in order to create the feeling of the game. So, although there are a lot of good melodies, there are also lots of lyrics. Even so, I am satisfied because I believe I have created the unique style of the game. I hope you enjoy the game!

A short and crisp game that really makes you feel like you're playing the early Dragon Quest titles. I've never got around to playing those games, but now I absolutely have to. If I could give this an 8 it would be a 10. But I can't, because there are things that could be improved. BUT the things that can and should be improved are so minor that they'd hardly make a difference. If there was a 10.0 version of this game I'd be a 10.5. (I've been playing video games since the age of 2 and 10.5 is the highest score I'd give) The graphics are 9.99. I have a feeling this game is going to pull a Final Fantasy 7 and improve graphics. Anyone who thinks this game is on par with FF7 has no idea what they're talking about. It's not even close. But it's not bad. Just not up to par. The gameplay is 9.5. The gameplay is 9.5, but the interface is 9.9. And the interface is why I can't give this a 10. The story is 7.0. The story could be 10.0 if there was a 10.0 version of this game. I wouldn't recommend buying this game. I don't think you'll understand it. I'd recommend you rent it until you get the hang of the game. As far as multiplayer goes this game has potential. The multiplayer options are a 5.0. It needs to be made into something that appeals to the masses. Something that will appeal to people who don't want to be playing it all by themselves. The multiplayer could be 11.0. It could be 10.0 if there was a 10.0 version of this game. But there isn't. The music is 7.5. The music could be 9.0 if there was a 9.0 version of this game. Again, There isn't. The sounds are 6.0. The sounds should be 10.0 if there was a 10.0 version of this game. There isn't. The controls are 8.0, even though the game supports controllers. I don't like the pause game. It's barely there. The game is 5.0 overall. You could possibly argue that the graphics are 10.0. That the gameplay is bff6b2d33
