The Fool: Ayla - Ayla - Shaolin Ayla Skin Description: This DLC contains a custom skin for Ayla in Awesomenauts. You need to have Ayla available as a playable character in order to access the skin in-game. Owning this skin will also unlock the special portrait for use in-game. Introduction To Shaolin It has been one month since I've last talked about Shaolin. Not that this subject has ever been that interesting to me, but it's worth mentioning now that we have progressed to a stage where we can finally discuss the theme - Shaolin. How is Shaolin related to Awesomenauts? Well, if you have tried to read my last blog, it was made clear how closely the two themes are connected. As you may have already guessed, I am talking about Kung Fu and Kung Fu monks! If you have been following this blog from the beginning, you already know that I am not the biggest fan of the game Kung Fu and maybe it shows. That's why I like to avoid using the name Awesomenauts. Obviously, you can see this here. The name of the game is very well, but it is impersonal and does not lend any personal touch to the project. As we near our last missing piece in the Kung Fu topic, it is worth mentioning that the monks of Shaolin are the ones who actually make the monks in Awesomenauts. You cannot play as a monk without the monk bowing to the Shaolin

order as they start their journey. What exactly is the Shaolin order? There are three major features that show the existence of Shaolin monks and they are - The Shaolin Temple of Wudang Shaolin Temple of Wudang: In order to start the training of a Shaolin monk, the player has to go to the Wudang Shan mountain range located in China. This region is home to a Shaolin monastery, the Shaolin Temple of Wudang. The Shaolin Temple of Wudang has almost 600 years of history, when it was mentioned for the first time in the classic Chinese novel Journey to the West. In it the monk Tripitaka was referred to as 'Wudang Monk'. The Shaolin Temple of Wudang is the first and oldest temple of Shaolin monks. After some years the Buddhist temple where

How to help a child who won't go to bed Some people think that most parenting conflicts are about getting more things we want. This isn't always the case. A parent who wants to nag or scold or yell can have an ungodly outburst and wreck the evening for everyone involved. Having a child who won't go to bed, however, isn't simply about getting what we want. It's a matter of how we express our emotions. Helping a child cope with fears and insecurities involves compassion and empathy. With just a little effort, you can avoid having blown your own temper and salvage a night of peace for everyone. If your child seems prone to endless worrying, panic, nail-biting, physical discomfort, or in extreme cases, even suicide, it may be time to do a little exploring. Causes Fears and phobias are based in the subconscious, where they're totally under a person's control. From there they grow and multiply, and to confront them, to talk to someone is usually the first step. For some children, that might be too difficult or risky an undertaking. Developmental/psychological Brain development is a time when learning fits into an established system and so early in development it's hard for kids to tell apart reality from pretend. If your child has not begun to control his own environment, to reason about cause-and-effect relationships, and to understand they are safe, the normal pattern is to panic very easily. The fear part of the brain is fast and furious, and it takes time for people to learn how to calm themselves. As people grow to handle adult issues, they're sometimes forgotten or undervalued. When a child is in trouble and afraid and can't deal with it on her own, parents are often asked to help. That can be tricky because we don't always say the right things or offer the right medicine for our kid. Emotions are always close to the surface and don't do things step by step. We need to be gentle, curious, and open to learning from our

own kids. Psychologists suggest we start by examining our own fears. Often children feel what we don't express. Setting limits, setting the table, and pushing to the limits are some remedies that can make a child feel safe. Above all, be sensitive: a child can't help you understand until she's sure she can. Medical Kids with developmental concerns tend to be

"Gunspell is an addicting Match-3 that has a unique story line. Gameplay is quite challenging at times and something new and interesting to play every time you start the game. You have to wait for the right match to make the next move because you are unable to make the moves independently like in a normal Match-3. It is quite easy to get addicted to this game and keep playing it, just to get to the next part of the game. You can bring in achievements that make the game more challenging. Overall, this is a great game to play for a few hours to get lost in. Don't believe the hype though, it has nothing to do with Spellslinger."

The Swazi Rugby Football Union announced today that it has terminated contracts with all its contracted referees after a series of controversial encounters in the two-leg-knockout stage of the 2017/2018 Currie Cup qualification series. During the second leg of the matches, the Swazi media have covered the games of referees Johan Serfontein and Petrus Mazwi, who were seen to be biased against the Sharks and Griquas, respectively. In the other match, the officiating of George Kazuma and Sundashe Nathuwe were the subject of controversy, with the Swazi media reporting that Kazuma missed two penalties for the Sharks in the last 15 minutes of the match. "The Swazi Rugby Football Union is a newly established body within the South African Rugby Union and as such it is in the process of developing the sport in our country. "This is a difficult time as we are aware of the shortcomings of the referees that officiated in the Currie Cup Qualifiers and that they did not live up to the standards that the Swazi Rugby Football Union expects from our referees," said the Swazi Rugby Football Union. The Swazi media have reported that the referees had been warned over their performance during the qualification

games and were sanctioned for having a lack of commitment. "We will be considering all options to determine the best approach in addressing the matter at hand." Contacted for comment, SANZAR CEO Rogers Media, declined comment saying the matter was a matter for the Swazi Rugby Football Union. It is known in the prior art to provide a corrugating and gluing machine with a knife table for supporting a stack of flat paperboard and which may be selectively movable to an operative position where glue may be applied to
