What's New In SpeakToText?

- Includes free speech recognition technology from Microsoft - Includes audio recording, editing and playback - Includes voice chat with AIM, MSN, Yahoo, ICQ and PalTalk - Highlighted speech recognition with Google Voice - Create your own speech commands - Easy voice chat - Speech recognition technology from Microsoft - Tutorial speech commands - Free updates Input Transcription is a powerful and easy-to-use program for transcribing text into a wide variety of formats, from email to word processor files. Its advanced features allow you to write text snippets into a source, use speech recognition to transcribe automatically, or manually transcribe these snippets into any other format. This software's integrated spell checker makes sure your writing will not contain spelling errors. In addition to the text file format, it also offers file formats for speech, sound and multiple files. It can be integrated with desktop word processors such as Microsoft Word and Microsoft WordPad to create formatted text snippets as documents, or into email with professional email clients. Input Transcription Features: * Scans text documents or voice files * Processes multiple files at once * Inserts text snippets automatically into a document * Manually transcribes text * Speaks text snippets out loud * Easy to use * Easy to learn * Instant off-line use * Automatically detects text locations for more accuracy * Spell checker with dictionary support * Linking to Internet browser for online searches * Speeds up writing process * Text formatting option * Works with Windows XP, Vista and Windows 7 BSEditor: An Automatic Backup Software helps you to backup and restore all your data and settings to another partition or hard disk easily. It includes a scheduler to automate the backup process and you do not have to worry about it when you go out. It could back up automatically during your sleep and keep a full backup before system crash. And you can also restore your data to any new computer easily in several clicks. BSEditor Features: * Recover Partition: Re-create your partition easily. * Restore Data: Restore your data to a different partition or computer as if it was a new partition created from scratch. * Restore Data: This part of the software will back up your Windows operating system and keep settings for Windows components. * Restore Data: Windows Registry settings could also be backed up. * Restore Data: As a third-party registry editor you can fine tune many system settings
