I'm going to create a multilanguage web app. I have a database with "menu" strings in different languages. For example, "Menu_en" will be in English and "Menu_fr" will be in French. Then, when a user open the website, the menu will be displayed in the language of the user. But, what I'm struggling with is how to manage this menu.

My first idea is to create a PHP page that would parse the database, and then, based on the user's language, output a file of "menu" strings. For example, a file "menu_en.php" which will contains the English version of my menu. What do you think about this idea? Is there any other solution? Thanks. A: I'd suggest using i

Geraldine McCaughrean, principal of advertising at ICM

Partners, who is married to executive director of marketing advertising, Tinsley Mortimer, says of the new agency division: "The idea came up and I thought, 'Wow, that would be great.' So, I started floating it. I thought it might make sense and didn't have any issues with it. It's a fairly easy thing to do." McCaughrean, a London-based agency veteran of 17 years who was previously at London agency Elektra, and Mortimer met a couple of years ago when they both worked on Fred Phelps' "Save the Whales" campaign. The two will act as co-presidents of the new group and McCaughrean says that, along with programmatic, e-commerce and social, digital media will be the agency's priority. Although the combined roster of clients -- including Vodafone, JWT, Nokia,

Google, IBM and Harley Davidson -- seems to suggest they won't be giving up on mass media, the new agency is "a creative shop, not a media shop," and will be integrated into JWT and ICM. McCaughrean says, "It doesn't mean we won't be doing media -- we're just going to be doing it in a much more creative and integrated way."Q: How to perform an exact text comparison in sql I have a table "test" with 5 records. What's New In AutoCAD?

Autodesk has a history of embracing changes that improve productivity and make design work more fluid. Here's a quick look at five things you can expect when AutoCAD is released in October. New modeling

features: Progressive Surface Orientation and Color Grading: With AutoCAD 2023, you can make intuitive selections of irregular shapes and automatically have them repositioned and rotated to a uniform orientation. In addition, you can now color grade surfaces to look like the actual materials on a building or vehicle. (video: 1:12 min.) Material Properties: You can now configure and apply material properties to your drawing, such as multiple textures, reflection, gloss, and more. (video: 1:31 min.) While it's pretty easy to change the color of your model from a material's default, it's now even easier to select a different material and apply the properties you want. productivity and make design work more fluid. Here's a quick look at five things you can expect when AutoCAD is released in October. Take a look at the new features below, and if you have any questions about AutoCAD 2023, please visit our help center. We'll see you in Autodesk University! Scott Ritchie, lead architect for Autodesk's manufacturing and engineering team, will discuss the latest features and advancements in AutoCAD. In this year's Autodesk University, I'll discuss the following: Today, over 50% of the world's population uses a mobile device for work. This has created an unprecedented need for increased functionality on the desktop. The AutoCAD 2023 release is going to make that task much easier. You can now create

complex drawing and project templates that can be shared with others, using the new Shared Drawing Template functionality. These templates are usually helpful in documenting a project workflow and streamlining a team's workflow. Workflows make your life easier. To ensure that you're always working with a clean slate, all unsaved changes are gone when you exit a drawing or project. By using the new Message Bar, you can direct a team member on a project and send the drawing to them without having to look it up. You
