games on Steam, Origin, Uplay,
Nintendo eShop and other
download services.Q: Add
"Related" Link to Help and
Improvement (FAQ) The Main site's
Help and Improvement / FAQ
section contains a number of

commonly asked questions. Many of these are the result of misunderstandings, and are worthy of clearing up, but are not particularly useful unless they explain a series of related concepts. I suggest that we have a link to a "Related" section at the top of this page that will return a list of other commonly asked questions and points to a page that contains related information.

Any thoughts on this? A: I will second the idea of a linked page, though I think the link should point to a designated page not shared among all Help and Improvement pages, but instead a subpage of Help and Improvement that would

pertain to the related question, such as How to ask questions.

Protective effect of bilberry, baobab and aqueous extract of *Magnolia officinalis* leaves against methylmercury-induced DNA damage in vitro. Four different doses of *Magnolia officinalis* (Bailey) leaves were tested for their protective effect against methylmercury (MeHg)-induced DNA damage in V79 cells in vitro. Freshly prepared methanol extract of *M. officinalis* leaves (0.02-1.0 mg/ml) was tested for its ability to protect against methylmercury-induced damage to DNA, RNA and proteins. High performance liquid chromatography (HPLC) with

fluorescent detection system was used to evaluate the anticancer activity of *Magnolia officinalis* leaves. At concentrations of 0.02 and 0.1 mg/ml, *Magnolia officinalis* extract protected DNA, RNA, proteins and cell viability against methylmercury-induced cytotoxicity. At concentrations of 0.2 mg/ml and 1.0 mg/ml, there was no protective effect against DNA damage c6a93da74d
